RIC’S MONTHLY TOBAGO OUTREACH

In a continued effort to engage and educate the public on the role and responsibilities of the RIC, the organization recently hosted its first of a series of Outreach Sessions that will be held every month in Tobago at the Telecommunications Authority of Trinidad and Tobago (TATT) office in Gulf City Mall, Lowlands. The first outreach took place on Tuesday 10th July, 2018 from 10am – 2pm.

This initiative sought to disseminate information about the roles and functions of the RIC, educate customers on how they could save money on their electricity bills as well as address customer complaints and concerns with their utility providers. Members of the RIC staff got an opportunity to interact with the public and disseminated information through the distribution of promotional items and RIC brochures as well as face-to-face discussions. Visitors to the office also had the opportunity to lodge complaints and have their questions answered by a Customer Service Officer of the RIC.

Look out for our next outreach in Tobago!
OOCUR ECONOMETRICS TRAINING

Five-day training workshop entitled “Econometric Techniques for Caribbean Regulators”

The Organization of Caribbean Utility Regulators (OOCUR), is a non-profit, member-driven organization serving as a catalyst for regulatory improvement in the Caribbean. OOCUR’s mission is to foster transparent and stable utility regulation through independent regulators, undertake research, training and development and facilitate the sharing of regulatory issues and experiences among member countries.

OOCUR recently held a five-day training workshop entitled “Econometric Techniques for Caribbean Regulators” at the offices of the Regulated Industries Commission (RIC) in Port of Spain, Trinidad and Tobago. The training took place from August 20 – 24, 2018 and was facilitated by Dr. Patrick K. Watson, Professor Emeritus at the University of the West Indies, where he served, until retirement in September 2017, as Professor of Applied Economics and University Director at the Sir Arthur Lewis Institute of Social and Economic Studies. He also served as Dean of the Faculty of Social Sciences from 1995 to 2003. He holds Master’s and Doctoral degrees in Mathematical Economics and Econometrics from the Université de Paris I (Panthéon-Sorbonne) and a Bachelor of Commerce degree, with Accounting as a principal subject, from the University of Leeds.

Participants included staff from the RIC, Independent Regulatory Commission (IRC) – Dominica, Fair Trading Commission (FTC) – Barbados and the Telecommunications Authority of Trinidad & Tobago (TATT). The Training Course introduced participants to fundamental methods of Econometric Techniques. It focused on techniques having immediate applicability to the day-to-day problems faced by Caribbean Utility Regulators so that participants could

develop more efficient ways in which to carry out certain routine but vital operations of their organizations, principally for purposes of forecasting and policy analysis. One of the key topic areas covered included the scope and purpose of econometric modeling: the notion of an econometric model; the importance of economic theory; the relevance of data and data problems (with particular reference to the Caribbean); the use of econometric models.

One of the participants, Ms. Marsha Atherley-Ikechi, Director of Utility Regulation at the FTC Barbados was noted as saying “A critical element of the regulatory process is forecasting demand and the potential impacts of regulatory decisions. OOCUR’s Econometrics Workshop has provided participants with the foundational understanding to adequately utilize this tool. Although the topic is highly complex, the facilitator, Dr. Watson, was able to humorously demystify the concepts.” OOCUR looks forward to providing more training opportunities in the future.

“A critical element of the regulatory process is forecasting demand and the potential impacts of regulatory decisions. OOCUR’s Econometrics Workshop has provided participants with the foundational understanding to adequately utilize this tool....”
The RIC is currently actively engaged in the Price Review Process for both T&TEC and WASA. With regard to the T&TEC Price Review the RIC recently completed the second phase of the process which included the publication and circulation of various consultative documents which detailed the RIC’s views on and methodologies/approach to key areas that inform the Review process. All stakeholders were invited to comment and provide their feedback on these documents. Stakeholders were invited to comment through advertisements in the press, posts on social media and direct e-mail. The comments and feedback are under review by the RIC.

The RIC will soon commence the third and final stage of the T&TEC Price Review which is the publication and circulation of the RIC document “Draft Determination (Rates and Miscellaneous Charges)”. All stakeholders will again be welcomed at this time to comment and provide their invaluable feedback on this crucial document. This phase will also include face to face public consultation sessions between the RIC and various stakeholders to provide the opportunity for stakeholders to disclose any concerns on the draft determination, for the consideration of the RIC. This is expected to begin in the fourth quarter of 2018.

The RIC is also currently in the second phase of the WASA Price Review Process, which, as mentioned above is the circulation of various consultative documents for stakeholder feedback. The RIC is currently awaiting information from both service providers that will allow it to complete the reviews. All documents related to the both the T&TEC and WASA Price Reviews can be accessed on the RIC’s website at www.ric.org.tt. As progress is made in this matter, the RIC shall provide future updates.

CARICOM Energy Head Pays A Courtesy Call On RIC

Dr. Devon Gardner, Programme Manager, Energy at CARICOM recently paid a courtesy call on the Regulated Industries Commission and OOCUR’s Chairman, Mr. Clayton Blackman during a recent visit to Trinidad and Tobago.

UWI World of Work

The Corporate Communications Department participated in the UWI WOW Recruitment Fair which took place on the 12th & 13th April, 2018. The RIC booth was well attended at the two-day event and the RIC team met with over 400 university students.

The WOW Recruitment Fair gave students of the university an opportunity to meet recruiters, submit their résumés and learn more about the different types of employment available at leading local and international organisations.

The RIC also used to occasion to educate the students about the role and responsibilities of the RIC and the job opportunities available at the organisation.
